

# The COVID-19 Triple Play:

## Three Keys to COVID Mitigation in Primary Care

*There are many strategies and a lot of information out there related to COVID-19. As we continue to face the Omicron surge, focus on three essential areas for primary care to mitigate COVID-19 -- primary care's triple play. Below you will find the three essential focus areas and related links to guide your practice.*

### **Vaccines**

- Order COVID-19 vaccines on Thursdays between 8:00-4:00PM
  - Pfizer 12+, Pfizer 5-11, Moderna 18+, and J&J 18+
- Outreach to patients to get them in for initial vaccines and booster dose appointments
- Refer patients to a vaccinating site or request a mobile vaccination clinic via this form

### **Testing**

- Order free Point-of-Care tests in order to quickly diagnose patients
  - Ordering form
- Consider PCR testing for asymptomatic patients
  - Review this webinar (beginning at 51:00) for PCR testing options
- Use this toolkit to guide testing protocols and communication

### **Therapeutics**

- Refer eligible patients for monoclonal antibody treatment
  - Refer in CRISP or use this referral form
- Use this Federal Therapeutics Locator website to identify where you can refer eligible patients for oral antiviral agents including Molnupiravir and Paxlovid

## **With this triple play, we can send COVID-19 to the dugout!**
